

EMERALD  
AFRICA

Revised: July 2015

At Emerald we are committed to Contract Certainty and strive for clarity in all of our contractual dealings. To this end we have compiled a standard assets all risk policy wording specifically for mining exposures and another specifically for non-mining exposures. The policy is presented in clear and unambiguous language and format, and is available in either hard copy or electronic media.

The advantages are clear: Both our business partners and ourselves know exactly the nature and extent of their security and our exposure.

Emerald remains committed to innovative solutions however, and we are always ready to negotiate wordings that reflect specific client needs.

All wordings are always subject to the terms of our own reinsurance treaty terms.
